FULL AUTOMATIC TURKISH
COFFEE MACHINE (THAT MAKES
THE COFFEE ON THE CUP)

Real Turkish Coffee

Automatic Turkish Coffee on the Cup Machine is designed exclusively for the making of original Turkish Coffee. The cup that contains Turkish Coffee is placed on the machine. The process starts by pressing the button. It takes the necessary water into the cup automatically. The mixer, heater and sensors that go into the cup make the coffee while stirring it continuously. Thus the coffee is being made slowly in 2 minutes while preserving its natural flavor rather than exposing the granules to high temperature directly. Your unique foamy Okkali Turkish Coffee is ready to serve.

Remote Monitoring System

Automatic Turkish Coffee on the Cup Machines work with the counter system. It features remote control. There can be no illegal use. It provides an excellent control system for businesses like cafes and restaurants. Instant monitoring is possible via network or cell phone.

Professional Usage and Service

Automatic Turkish Coffee on the Cup Machine is a patent article that is produced by special materials developed through long stability tests. In order to minimize malfunction, the product contains remote control feature and a service model that includes product change options. All kinds of service is provided by the producing company.

Machine free of charge + Turkish Coffee

Automatic Turkish Coffee on the Cup Machines are not for sale. The machines are set up according to the need, free of charge. They are given according to the amount of coffee ordered for one year.
